JEMUEL SUSUSCO

Antipolo City, Rizal, Philippines | +63 956-406-0687 | +63 912-362-6376 | jemz291994@gmail.com

PROFESSIONAL SUMMARY

AI-powered automation specialist and AI development engineer with 3+ years of experience designing and implementing end-to-end workflow automation solutions and web applications. Proficient in no-code/low-code platforms (GoHighLevel, n8n, Zapier, Make, Lovable, Base44) and AI-driven application development with Claude Code. Demonstrated expertise in AI agent development, data pipeline architecture, SaaS integration, and application deployment to GitHub, Vercel, and Fly.io. Technical background in IT support and systems administration enables both technical and user-focused problem solving. Seeking roles in automation engineering, AI development, or AI systems design.

CORE COMPETENCIES

Workflow Automation

- GoHighLevel (platform management, lead generation, chatbots)
- n8n (multi-system orchestration, complex workflows)
- Zapier & Make.com (SaaS integration, task automation)
- Lovable & Base44 (AI-powered apps, visual development)

Data & Integration

- Data pipelines: scraping, ETL, transformation
- API integration: REST, GraphQL, OAuth, webhooks
- Database integration: Airtable, ClickUp, Zoho
- Error handling, logging, fallback mechanisms

AI & Advanced Features

- LLM-powered agents and agentic workflows
- Prompt engineering and structured outputs
- AI chatbot design and implementation
- Validation logic and intelligent fallback systems

AI Development

- Claude Code (AI-assisted development, rapid prototyping)
- Frontend: React, Next.js, Tailwind CSS, JavaScript/TypeScript
- Backend: Node.js, Express, Database Design
- Deployment: GitHub, Vercel, Fly.io, CI/CD pipelines

PROFESSIONAL EXPERIENCE

IT Automations Specialist

Byrdson Services | January 2024 – Present

- Managed and maintained GoHighLevel platform for company-wide operations, serving as primary automation architect for multiple departments
- Designed and deployed lead generation workflows resulting in improved conversion rates and optimized sales funnel performance
- Built AI-powered chatbots and automated workflows leveraging LLMs with structured prompts, validation logic, and intelligent fallback mechanisms
- Developed complex multi-system workflow orchestrations using n8n, Make, and Zapier for seamless cross-platform integration
- Implemented data pipelines for lead scraping, unstructured data processing, and transformation into structured, actionable formats
- Integrated SaaS platforms, databases, and internal tools via REST/GraphQL APIs, OAuth, and custom HTTP requests

- Designed automation systems prioritizing reliability through logging, error handling, and clear handoff points between AI and deterministic steps
- Documented automation processes and created comprehensive standard operating procedures (SOPs) for team training and adoption

AI Development Engineer (Claude Code)
Independent Projects | 2024 – Present

- Built AI-driven web applications using Claude Code, leveraging AI-assisted development for rapid prototyping and feature implementation
- Developed responsive frontend applications with React, Next.js, and Tailwind CSS for modern user experiences
- Implemented backend services using Node.js and Express with RESTful API design patterns
- Deployed applications to Vercel for frontend hosting, Fly.io for backend services, and GitHub for version control and repository management
- Integrated third-party APIs, databases, and authentication systems (OAuth, JWT) into applications
- Managed Git workflows including branching, merging, pull requests, and deployment pipelines from GitHub repositories
- Applied best practices for code organization, error handling, and application security across frontend and backend

NightOwl Consulting | December 2022 – October 2023

- Managed comprehensive client billing systems using Airtable with automated workflows, ensuring accurate financial records and streamlined processes
- Created custom workflow automations to reduce manual task execution and improve team productivity
- Designed dynamic and comprehensive reporting dashboards to support data-driven client decision-making and performance tracking
- Collaborated with clients to design tailored database structures and automation logic aligned with specific business requirements

IT Specialist
ZZ Connect Inc. | April 2020 – November 2022

- Managed IT-related support tickets and resolved hardware/software issues for end users
- Maintained website functionality and performed routine maintenance tasks to ensure optimal uptime
- Designed and implemented ClickUp automation processes to streamline project management workflows
- Performed WordPress maintenance including updates, theme customization, and plugin management

EDUCATION

Bachelor of Science in Information Technology
ICCT Colleges Foundation, Inc. | December 2017
Graduated with Leadership Awardee distinction

TECHNICAL SKILLS & TOOLS

AI-Assisted Development: Claude Code, AI-powered application development, rapid prototyping

Frontend Development: React, Next.js, Tailwind CSS, JavaScript/TypeScript, HTML, CSS

Backend Development: Node.js, Express, RESTful APIs, Database Design

Deployment & DevOps: GitHub (version control, workflows), Vercel (frontend hosting), Fly.io (backend services), CI/CD pipelines

Automation Platforms: GoHighLevel, n8n, Zapier, Make.com, Lovable, Base44, Airtable, ClickUp, Zoho

Integration & APIs: REST APIs, GraphQL, OAuth, JWT, Webhooks, Custom HTTP Requests

AI & Machine Learning: LLM-Powered Agents, Prompt Engineering, Chatbot Development

Programming & Scripting: JavaScript, Python, Bash, Custom Logic Development

Data Processing: Data Pipeline Design, ETL, Web Scraping, Data Transformation, Structured Data Formats

Web & CMS: WordPress, Website Maintenance, Website Management

Documentation & Process: Technical Documentation, SOP Development, Process Mapping, Training Material Creation

IT Support: Hardware Troubleshooting, Software Support, System Administration
