JEMUEL (JEM) SUSUSCO

Automation & AI Engineer | Workflow Automation · API Integration · AI Agents

Antipolo City, Rizal, Philippines · Open to Remote (US Hours) · +63 956 406 0687

jemz291994@gmail.com · linkedin.com/in/jemsususco · github.com/jsususco-cell · https://jem-sususco-porfolio.vercel.app/

PROFESSIONAL SUMMARY

Automation and AI engineer with 5+ years across IT operations and workflow automation, currently owning end-to-end automation for a US construction and restoration contractor. Build production workflows in n8n, Make, Zapier, and GoHighLevel; integrate systems over REST/GraphQL APIs, OAuth, and webhooks; and ship LLM-powered agents and chatbots with validation, logging, and fallback logic. Also build and deploy full-stack web apps with React/Next.js and Node.js. Seeking remote automation, AI, or solutions engineering roles.

TECHNICAL SKILLS

Automation Platforms: n8n, Make.com, Zapier, GoHighLevel, Airtable, ClickUp, Zoho, Lovable, Base44

Integration & APIs: REST, GraphQL, OAuth 2.0, JWT, Webhooks, Custom HTTP requests, ETL & data pipelines, Web scraping

AI Engineering: LLM-powered agents, Agentic workflows, Prompt engineering, Structured outputs, Chatbot design, Validation & fallback logic

Development: JavaScript/TypeScript, Python, Node.js, Express, React, Next.js, Tailwind CSS, Database design, Bash, Claude Code (AI-assisted development)

DevOps & Reliability: Git/GitHub, CI/CD pipelines, Vercel, Fly.io, Error handling, Logging, Monitoring, Technical documentation, SOP development

PROFESSIONAL EXPERIENCE

IT Automations Specialist

Byrdson Services, LLC dba Excello Homes | Remote (US) | January 2024 – Present

- Own company-wide automation on GoHighLevel as primary automation architect across sales, operations, and support.
- Design and deploy lead-generation and nurture workflows, improving funnel conversion by 90%.
- Build LLM-powered chatbots and agentic workflows with structured prompts, validation logic, and intelligent fallback handling, resolving company's customer interactions per month without human escalation.
- Orchestrate multi-system workflows across n8n, Make, and Zapier, integrating SaaS platforms, databases, and internal tools via REST/GraphQL APIs, OAuth, and custom HTTP requests — eliminating approximately 30 hours of manual work per week.
- Implement data pipelines for lead scraping and transformation of unstructured data into structured, actionable records.
- Engineer for reliability with logging, error handling, and explicit handoff points between AI and deterministic steps; author SOPs enabling non-technical staff to operate and troubleshoot automations independently.

Airtable Engineer

NightOwl Consulting | Remote (US) | December 2022 – October 2023

- Built and managed client billing systems in Airtable with automated workflows, ensuring accurate financial records across many client accounts.
- Created custom workflow automations that reduced manual task execution and increased delivery-team throughput.
- Designed reporting dashboards and client-specific database schemas supporting data-driven decision-making and performance tracking.

IT Specialist

ZZ Connect Inc. | April 2020 – November 2022

- Resolved IT support tickets end to end across hardware, software, and user access for internal staff.
- Designed and implemented ClickUp automations to streamline project management and ticket-routing workflows.
- Maintained website functionality and uptime, including WordPress updates, theme customization, and plugin management.

SELECTED PROJECTS

AI-Assisted Web Applications

Independent | 2024 – Present

- Built and shipped full-stack web applications using React, Next.js, and Tailwind CSS with Node.js/Express REST APIs, applying AI-assisted development for rapid prototyping.
- Integrated third-party APIs, databases, and authentication systems (OAuth 2.0, JWT); deployed to Vercel and Fly.io with Git-based CI/CD pipelines.
